Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Installation Checklist

A. Application Data

Equipment ID:
Area Served:
Location:

B. Model Data

1-Manufacturer	Submitted Data
	Actual
2-Model Number	Submitted Data
	Actual
3-Serial Number	Actual

C. Design Requirements

2- Heating Coil Capacity (MBH)	Submitted Data
	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Location:

B. Model Data

1-Manufacturer	Submitted Data
	Actual
2-Model Number	Submitted Data
	Actual
3-Serial Number	Actual

C. Design Requirements

2- Heating Coil Capacity (MBH)	Submitted Data
	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Installation Checklist

A. Application Data

Equipment ID:
Area Served:
Location:

B. Model Data

1-Manufacturer	Submitted Data
	Actual
2-Model Number	Submitted Data
	Actual
3-Serial Number	Actual

C. Design Requirements

2- Heating Coil Capacity (MBH)	Submitted Data
	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Installation Checklist

A. Application Data

Equipment ID:
Area Served:
Location:

B. Model Data

1-Manufacturer	Submitted Data
	Actual
2-Model Number	Submitted Data
	Actual
3-Serial Number	Actual

C. Design Requirements

2- Heating Coil Capacity (MBH)	Submitted Data
	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Installation Checklist

A. Application Data

Equipment ID:
Area Served:
Location:

B. Model Data

1-Manufacturer	Submitted Data
	Actual
2-Model Number	Submitted Data
	Actual
3-Serial Number	Actual

C. Design Requirements

2- Heating Coil Capacity (MBH)	Submitted Data
	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Installation Checklist

A. Application Data

Equipment ID:
Area Served:
Location:

B. Model Data

1-Manufacturer	Submitted Data
	Actual
2-Model Number	Submitted Data
	Actual
3-Serial Number	Actual

C. Design Requirements

2- Heating Coil Capacity (MBH)	Submitted Data
	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Installation Checklist

A. Application Data

Equipment ID:
Area Served:
Location:

B. Model Data

1-Manufacturer	Submitted Data
	Actual
2-Model Number	Submitted Data
	Actual
3-Serial Number	Actual

C. Design Requirements

2- Heating Coil Capacity (MBH)	Submitted Data
	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

B. Model Data

1-Manufacturer	Submitted Data
	Actual
2-Model Number	Submitted Data
	Actual
3-Serial Number	Actual

C. Design Requirements

2- Heating Coil Capacity (MBH)	Submitted Data
	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Installation Checklist

A. Application Data

Equipment ID:
Area Served:
Location:

B. Model Data

1-Manufacturer	Submitted Data
	Actual
2-Model Number	Submitted Data
	Actual
3-Serial Number	Actual

C. Design Requirements

2- Heating Coil Capacity (MBH)	Submitted Data
	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Installation Checklist

A. Application Data

Equipment ID:
Area Served:
Location:

B. Model Data

1-Manufacturer	Submitted Data
	Actual
2-Model Number	Submitted Data
	Actual
3-Serial Number	Actual

C. Design Requirements

2- Heating Coil Capacity (MBH)	Submitted Data
	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

	Actual
3 - Supply Fan Motor Volts / Phases / Amps	Submitted Data
	Actual

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

D. Install Checks

General Installation

Unit is free of visible damage
Permanent nameplate affixed to unit
Unit is accessible for routine maintenance
Permanent electrical service is available
Unit is installed level.
Unit is securely anchored / mounted.

Pre-Functional Checklist

Equipment ID:	

Controls

Control wiring complete	

Electrical

Conduit is supported	
Power disconnects labeled and installed	
Grounding installed for unit and unit components	
Wiring is protected	

Hot Water Coil

Piping is supported independently at coil	
Piping system flushed, cleaned, and pressure tested	
Coil has been tested for leaks	
Coil is clean with no damage to fins	
Access provided to coil	
All valves and strainers installed in the correct flow direction	
Pipes insulated and labeled	
Manual air vent, isolation valves, P/T plugs installed, and strainer installed	
Hydronic components checked for leaks	
Manual valves fully open and close	

Supply Fan

Vibration Isolation Installed	
Fan Guard Installed	
Fan rotates in the proper direction	
No unusual noise or vibration during operation

Pre-Functional Checklist

Job:	Webster ISB
Proj.#:	1136-16

General Notes:

All items complete unless noted Project Manager's Name (Printed):		
Project Manager's Signature:		

Instructions:

Provide " ✔ " for all all successful checks.
Use keyed notes at bottom for failed checks.

Initials:							
Start Date:	/ /	/ /	/ /	/ /	/ /	/ /	/ /
Start Time:	:	:	:	:	:	:	:
End Date:	/ /	/ /	/ /	/ /	/ /	/ /	/ /
End Time:	:	:	:	:	:	:	:

Installation Checklist

A. Application Data

Equipment ID:	TAG-9	TAG-10	TAG-11	TAG-12	TAG-13	TAG-14	TAG-15
Area Served:							
Location:							

B. Model Data

1-Manufacturer	Submitted Data							
	Actual							
2-Model Number	Submitted Data							
	Actual							
3-Serial Number	Actual							

C. Design Requirements

1- Unit Size (in)	Submitted Data							
	Actual							

D. Install Checks

General Installation

Unit is free of visible damage.							
Permanent nameplate affixed to unit.							
Unit is accessible for routine maintenance.							
Primary air damper is not damaged and seals tight.							
Permanent electrical service is available							
Unit is installed level.							
Unit is securely anchored / mounted.							

Pre-Functional Checklist

Equipment ID:	TAG-9	TAG-10	TAG-11	TAG-12	TAG-13	TAG-14	TAG-15
Area Served:							
Location:							
Ductwork							
Ductwork is clean, free of debris and flow restrictions.							
Ductwork connected and clean							
Ductwork seams sealed							
Supply ductwork is insulated							
Controls							
Control wiring complete.							

Heating		
Hot Water Valve Cv (2-Way or 3-Way)	(2-Way or 3-Way)	
	Submitted CV	
	Actual (2-Way or 3-Way)	
	Actual Cv	
Piping is supported independently at coil		
Coil has been checked for leaks		
Coil is clean with no damage to fins		
Access provided to coil		
All valves and strainers installed in the correct flow direction		
Pipes insulated and labeled		
Manual air vent, manual valves, and strainer all installed		
Hydronic components checked for leaks		
Manual valves fully open and close		

Pre-Functional Checklist

Piping is supported independently at coil		
Coil has been checked for leaks		
Coil is clean with no damage to fins		
Access provided to coil		
All valves and strainers installed in the correct flow direction		
Pipes insulated and labeled		
Manual air vent, manual valves, and strainer all installed		
Hydronic components checked for leaks		
Manual valves fully open and close

D. Install Checks							
General Installation							
Unit is free of visible damage							
Permanent nameplate affixed to unit							
Unit is accessible for routine maintenance							
Penetrations in unit are sealed							
Dampers installed							
Permanent electrical service is available							
Unit is installed level.							
Unit is securely anchored / mounted.							
Ductwork							
Ductwork is clean, free of debris and flow restrictions							
Ductwork connected and clean							
Ductwork seams sealed							
Controls							
Control wiring complete							
Electrical							
Conduit is supported							
Power disconnects labeled and installed							
Grounding installed for unit and unit components							
Wiring is protected
