Subject: Alternate Trash Receptacle

Response Required By: May 03, 2017

Drawing / Spec Reference:

Information Requested:

The Rubbermaid 3568 trash receptacle called out on A0901 is a discontinued item and they do not have an alternate in the same size. We propose to use the trash receptacle at the following link

<https://www.knapeandvogt.com/content/qt50pb-p>

Please advise if this will be acceptable or provide an alternate.

Response:

Alternate is acceptable, provided it is confirmed -

1. that it fits in planned drawer.
2. that it is planned for and accommodated by the casework at the shop - before the casework arrives on site. Seems like the flanges below the trash can lip would be in conflict with the opening and might need to be trimmed to fit in drawer opening.

ARCHITECT'S RESPONSE:

This information is provided as an interpretation of the Contract Documents for implementation. It is not an authorization for change to the Contract Sum or Contract Time. If this information results in a claim for a change to the Contract, the Contractor shall notify the [Construction Manager][Architect] of a change through the change process.

Subject: FG3568 sub

Good morning Devon,

We spoke briefly this morning about item FG3568. It looks like they discontinued this item to expand the size of the product. The only substitute that we have close to FG3568 would be FG3569, we currently do not have one with the same dimensions as the previous untouchable.

Thank you,

Brianna
