REQUEST FOR INFORMATION **DATE:** July 21, 2017 **NO.:** RFI-595

To: Cannon Design

Attn: Kelvin Patel

From: Paric Corporation

Requested By: Ryan Tune

Project Name: 15051-Webster University Interdisciplinary Science Building Project No.: 15051

Subject: Attaching Track Hanger for Aquarium

Response Required By: July 28, 2017

Drawing / Spec Reference:

Information Requested:

The track cannot be fastened to the wall without drilling through the track as shown on 7/A0802. Paric proposes to drill through the face of the track to install the fastener, and then bringing the wood trim over the face to cover the hole.

Response: AS NOTED ON 4/A0607, ATTACH SLIDING TRACK TO WALL USING SIDE FIXING ANGLE.
SEE ATTACHED PRODUCT DATA FOR ANGLE (ACCESSORY OF TRACK).

DRILLING THROUGH THE FACE OF TRACK IS NOT ACCEPTABLE.

ATTACH ANGLE TO WALL AND ATTACH THE TOP OF TRACK TO THE ANGLE AS ILLUSTRATED IN ANGLE PRODUCT DATA.

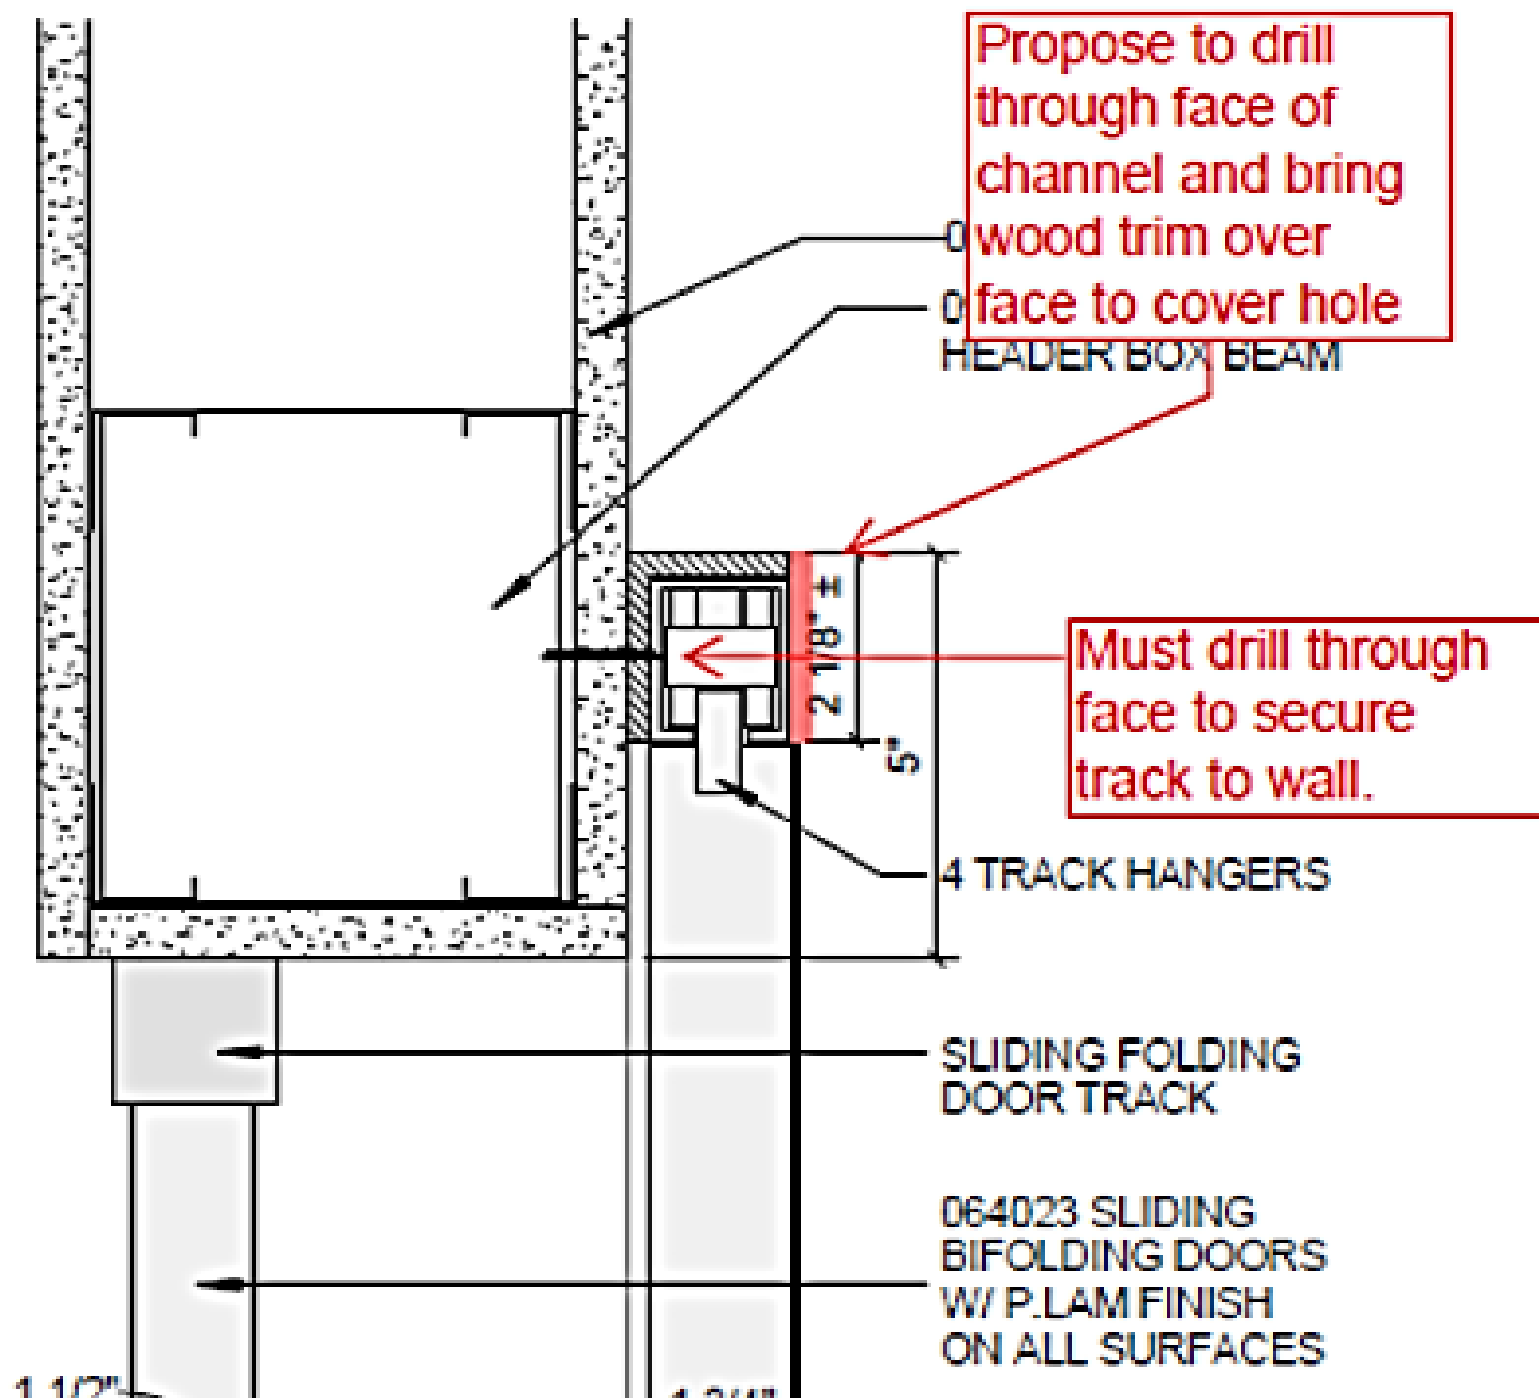

ARCHITECT'S RESPONSE:

This information is provided as an interpretation of the Contract Documents for implementation. It is not an authorization for change to the Contract Sum or Contract Time. If this information results in a claim for a change to the Contract, the Contractor shall notify the [Construction Manager][Architect] of a change through the change process.
