

Clipso Cleaning & Maintenance

www.clipso.com

CLIPSO® Technical Fabric is a polyester fabric coated with polyurethane, which under most circumstances, protects it from absorbing odors. It is hydrophobic and anti-static, thus requiring little or no maintenance.

The CLIPSO Cleaner and Cleaning Glove

If cleaning is required, CLIPSO provides a cleaning spray called “Clipso Cleaner” (Ref# O-CCL10E) (500mL), and a cleaning glove (Ref# O-GN20E), which can be ordered by contacting us at contactusa@clipso.com or 646-422-0919 ext. 704.

How to Clean CLIPSO Fabric?

Apply the CLIPSO Cleaner to the microfiber glove (or a soft cloth) and rub gently. If the stain persists, you may repeat this process several times.

Under no circumstance should products containing bleach be used.

CLIPSO does not warranty its products if foreign cleaning substances are applied which may cause discoloration or impact the integrity of the fabric.
