Inspection Services

Ahern Fire Protection performs inspection services for all types of fire protection systems. Inspections are conducted in accordance with NFPA standards, including full testing of systems and devices to ensure that components are in prime working condition. We offer inspection services geared to provide automatic periodic inspections required by authorities having jurisdiction and insurance carriers. **Ahern Fire Protection** maintains your inspection schedule so you do not have to. Our full-range inspection packages are cost effective. We offer the following inspections and services:

- **Wet Fire Sprinkler System Inspection**
- **Dry Fire Sprinkler System Inspection**
- **Backflow Device Inspection and filing with the Proper Authorities**
- **Fire Pump Inspection**
- **Preaction Sprinkler System Inspection**
- **Deluge Fire Sprinkler System Inspection**
- **Anti-Freeze Loop Inspections**
- **Private Fire Hydrant Inspections**
- **Foam System Testing and Inspections**
- **MIC® (Microbiologically Influenced Corrosion) Testing and Inspections**

Regulations for inspections of fire safety systems are determined by the National Fire Protection Association. Cities and states use these regulations as a guideline, and then make appropriate amendments according to their needs.

Required Inspections

How often should your fire sprinkler suppression system be tested? The National Fire Protection Association publishes NFPA 25 Inspection, Testing and Maintenance of Water-Based Fire Protection Systems; this document will provide recommendations on proper testing of your system. You may call **Ahern Fire Protection**, check with NFPA 25 or the manufactures' literature for details.

At least once each year, a full sprinkler system inspection should be performed by a knowledgeable professional. **Ahern Fire Protection** offers economical long-term service agreements. We will provide you with inspection reports and test certificates which will comply with your insurance company and local fire department inspection requirements.

You can contact our Service Department for the proper requirements in your area.
