

The ultimate simple room solution:
versatile, compact, and powerful

DM-DGE-200-C

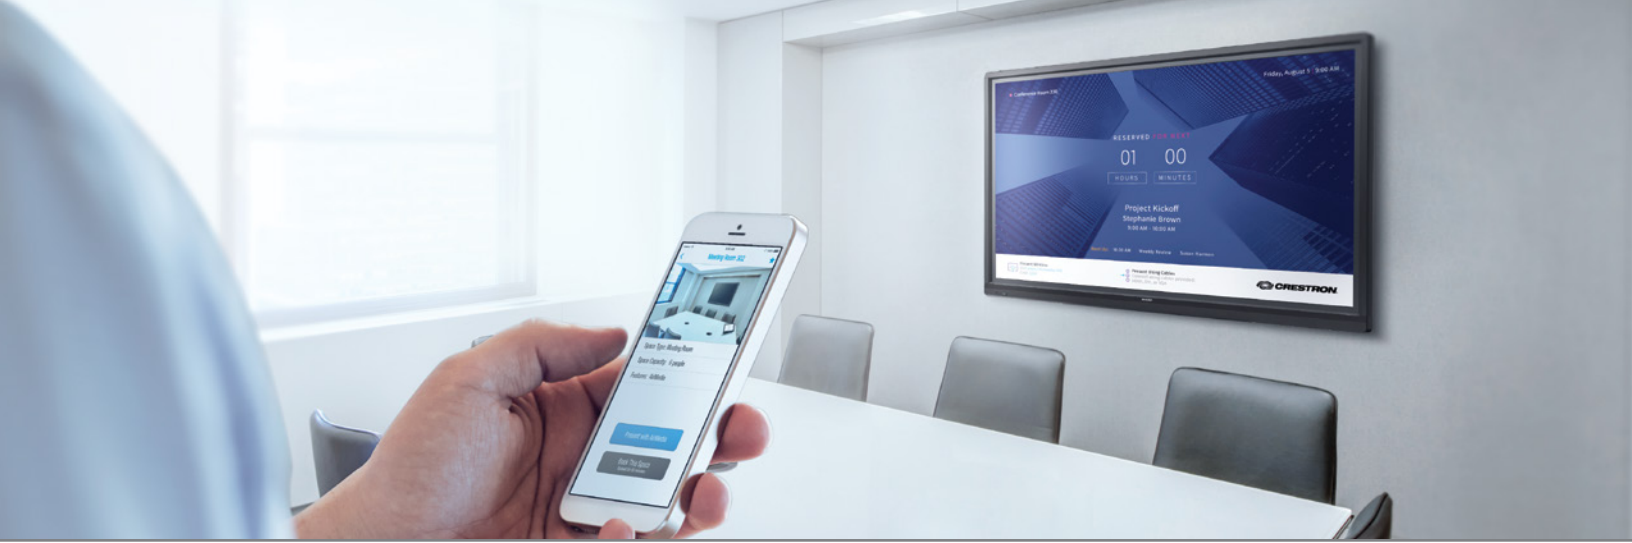

The new DigitalMedia™ DM-DGE-200-C gives you a highly versatile, powerful, and low-cost simple meeting room solution in a convenient low-profile, surface mountable package. It delivers plug-in & present functionality with no control system, touch screen, or programming required.

While it does boast a powerful digital graphics engine, that's just scratching the surface of its capabilities. It has everything you need for a multitude of applications:

- Wireless presentation (with addition of AirMedia® Presentation Gateway)
- Auto-switching and 4K presentation with scaling
- Auto display on/off via serial or CEC
- Room scheduling display (connected to Microsoft® Exchange or Crestron Fusion Cloud)
- Digital signage
- Multi-format video processing
- Decoding network AV
- Crestron Smart Graphics™ and web browsing for Crestron TSD-2020 and third-party large format touch displays

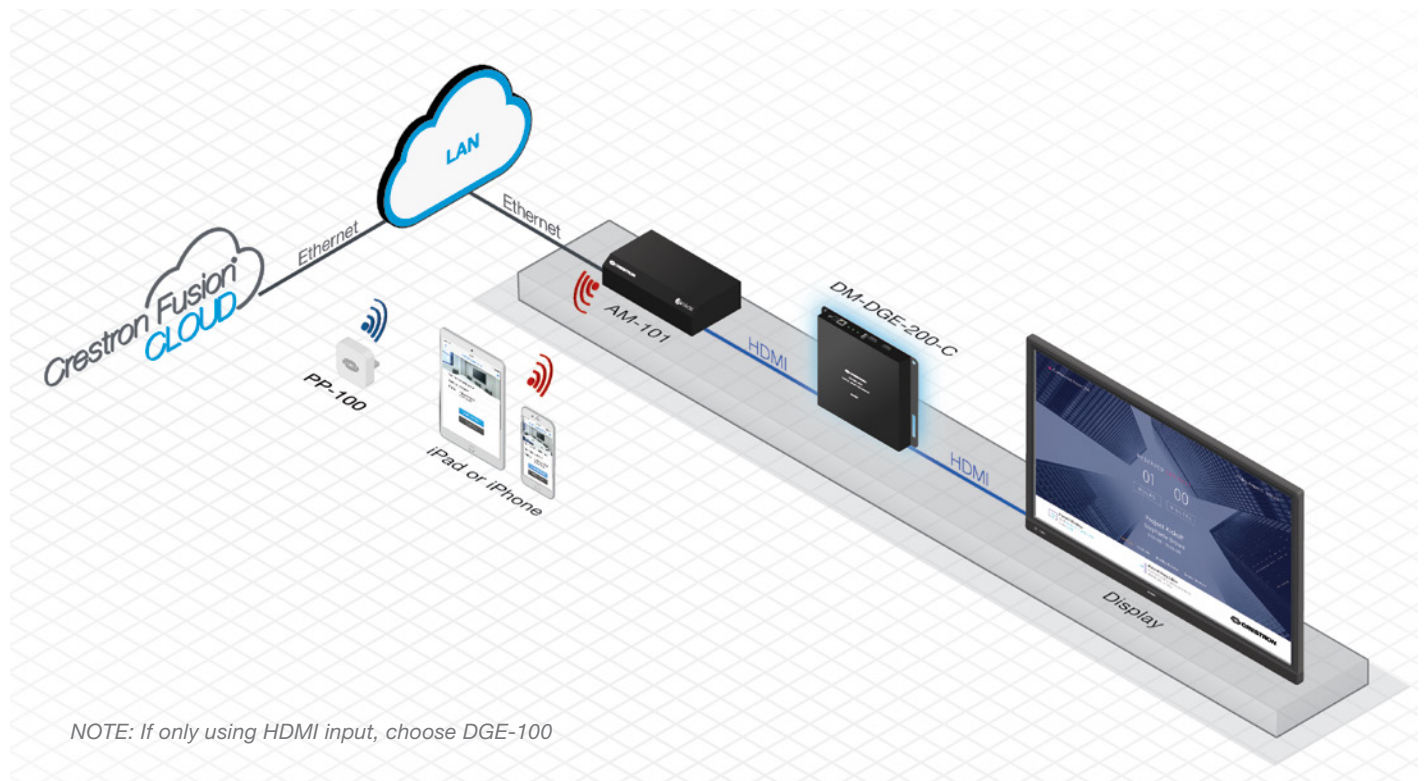

NOTE: DGE-100 also available. Does not include DM input.

Wireless Presentation and Personalized User Experience

Simply connect AirMedia to the HDMI input for wireless presentation. The DigitalMedia DM-DGE-200-C also enables powerful scheduling, automation, and messaging capabilities with no control system or touch screen required:

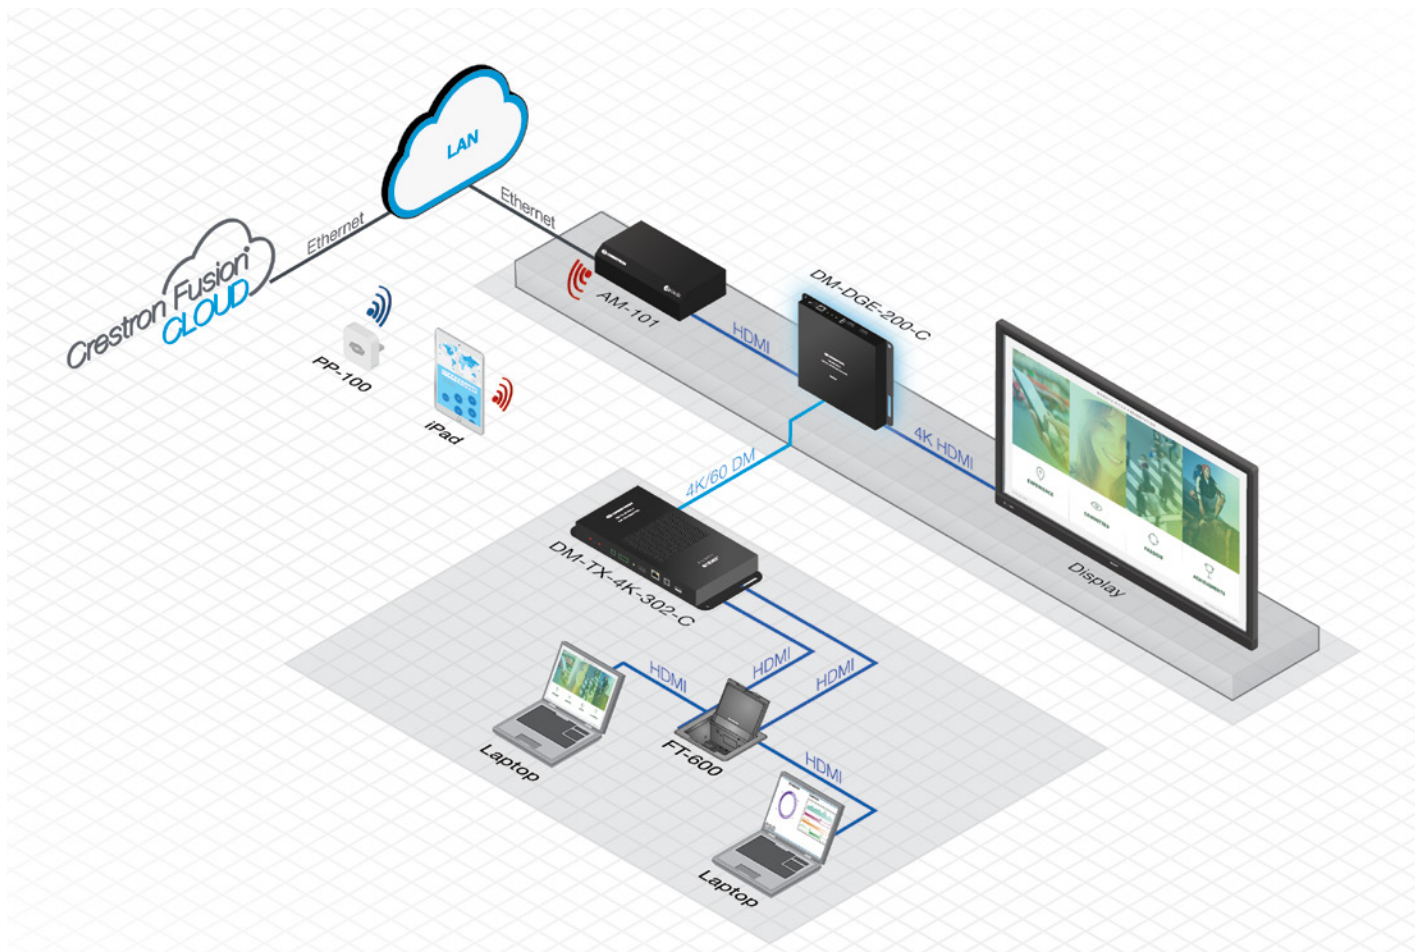

- Automatically turn on the room display when the first person arrives (requires USB camera with built-in motion detector, such as Crestron CCS-CAM-USB-F-100)
- Display a welcome screen with custom graphics, client logo, and simple connectivity instructions
- Show room availability and room calendar information on the room display, including organizer's name, meeting subject, start time, and duration, and availability (when connected directly to Microsoft Exchange or Crestron Fusion Cloud via LAN port)
- Display room scheduling information and collect device and room usage data (when connected to Crestron Fusion Cloud)
- Use the Crestron PinPoint™ app to locate and book rooms from your phone, and instantly connect to AirMedia when entering the room (when synced to Crestron Fusion Cloud)

Auto-Switching and 4K Presentation with Scaling

The DM-DGE-200-C can auto-switch between 4K/60 DM and 1080p HDMI then output scaled 4K HDMI to the display. The DM-DGE-200-C also features powerful room scheduling, automation, and messaging capabilities with no control system or touch screen required:

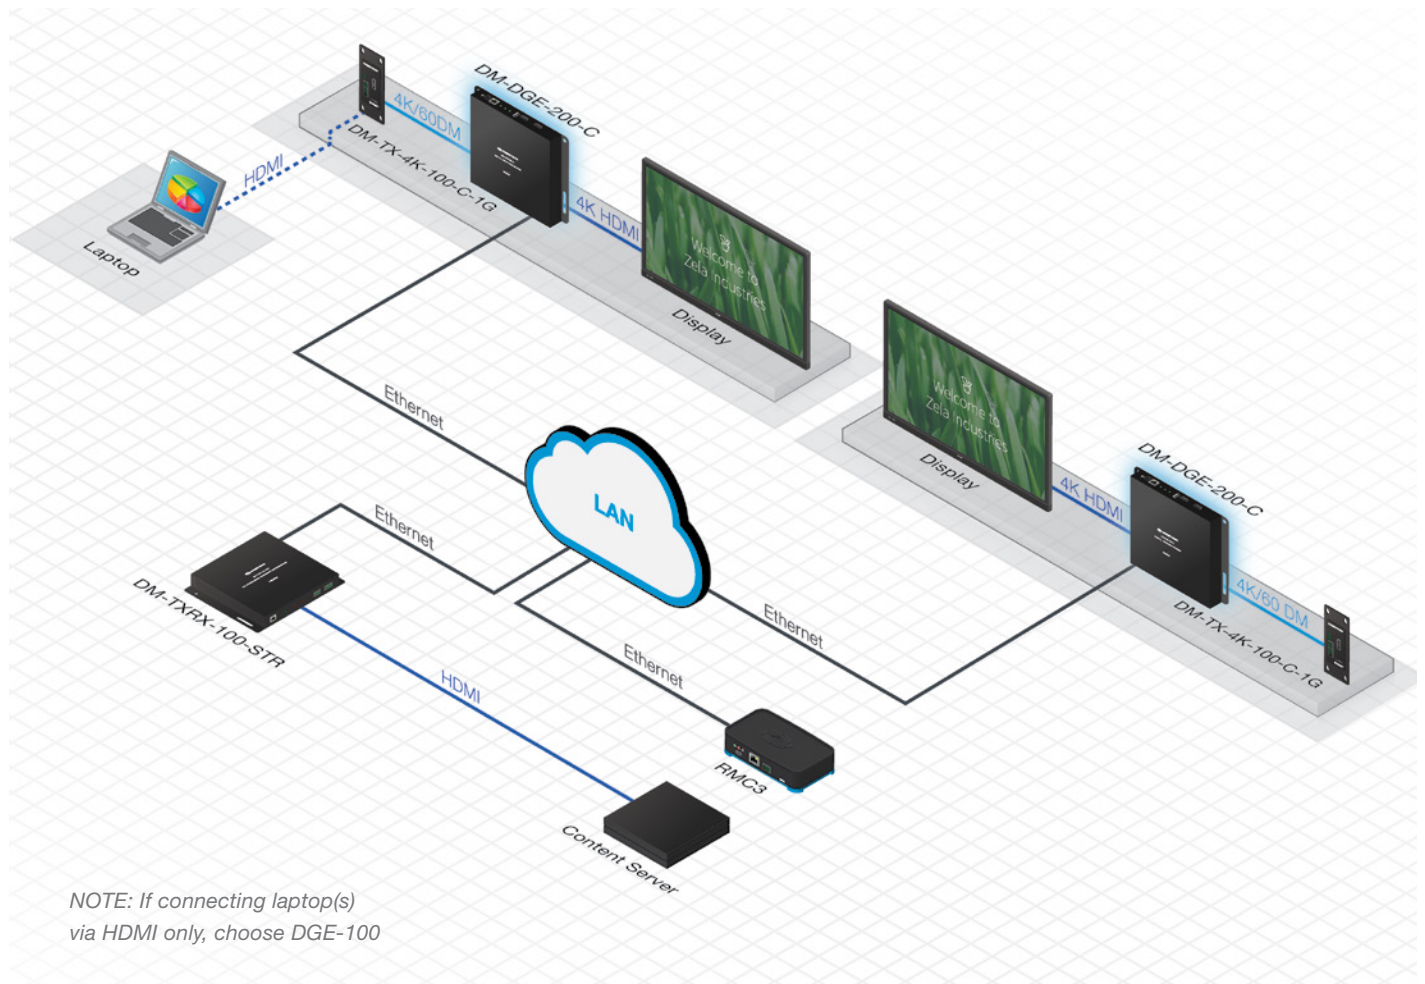

- Display 4K by connecting laptops to a DigitalMedia Transmitter (DM-TX-4K-302-C) under the table, which then connects to the 4K/60 DM input on the DM-DGE-200-C
- Auto-switch between any of the three inputs on the transmitter and the DM-DGE-200-C's HDMI input; output scaled 4K HDMI to the room display
- Automatically turn on room display via CEC or serial control (when laptop is connected); display can turn off when all laptops are disconnected
- Add easy tabletop connectivity with a Crestron FlipTop™ cable management system
- Add a DigitalMedia 4X1 HDMI Switcher (DM-MD4X1-4K-E) for more inputs
- Show room availability and room calendar information on the room display, including organizer's name, meeting subject, start time, and duration, and availability (when connected directly to Microsoft Exchange or Crestron Fusion Cloud via LAN port)
- Display room scheduling information and collect device and room usage data (when connected to Crestron Fusion Cloud)
- Use the Crestron PinPoint app to locate and book rooms from your phone, and instantly connect to AirMedia when entering the room (when synced to Crestron Fusion Cloud)

Digital Signage

Combined with the award-winning Crestron HD Streaming Transmitter/Receiver (DM-TXRX-100-STR), the DigitalMedia DM-DGE-200-C gives you a powerful low-cost solution for digital signage applications in hotel lobbies, airport lounges, retail spaces, and student and employee lounges. The DM-TXRX-100-STR encodes AV onto the network. The DM-DGE-200-C decodes it and transmits HDMI to the digital signage display. Even more exciting, the digital signage display is now a dual purpose display. Connect a laptop via HDMI or 4K DM for impromptu meetings. When the laptop is disconnected, the digital signage reappears.

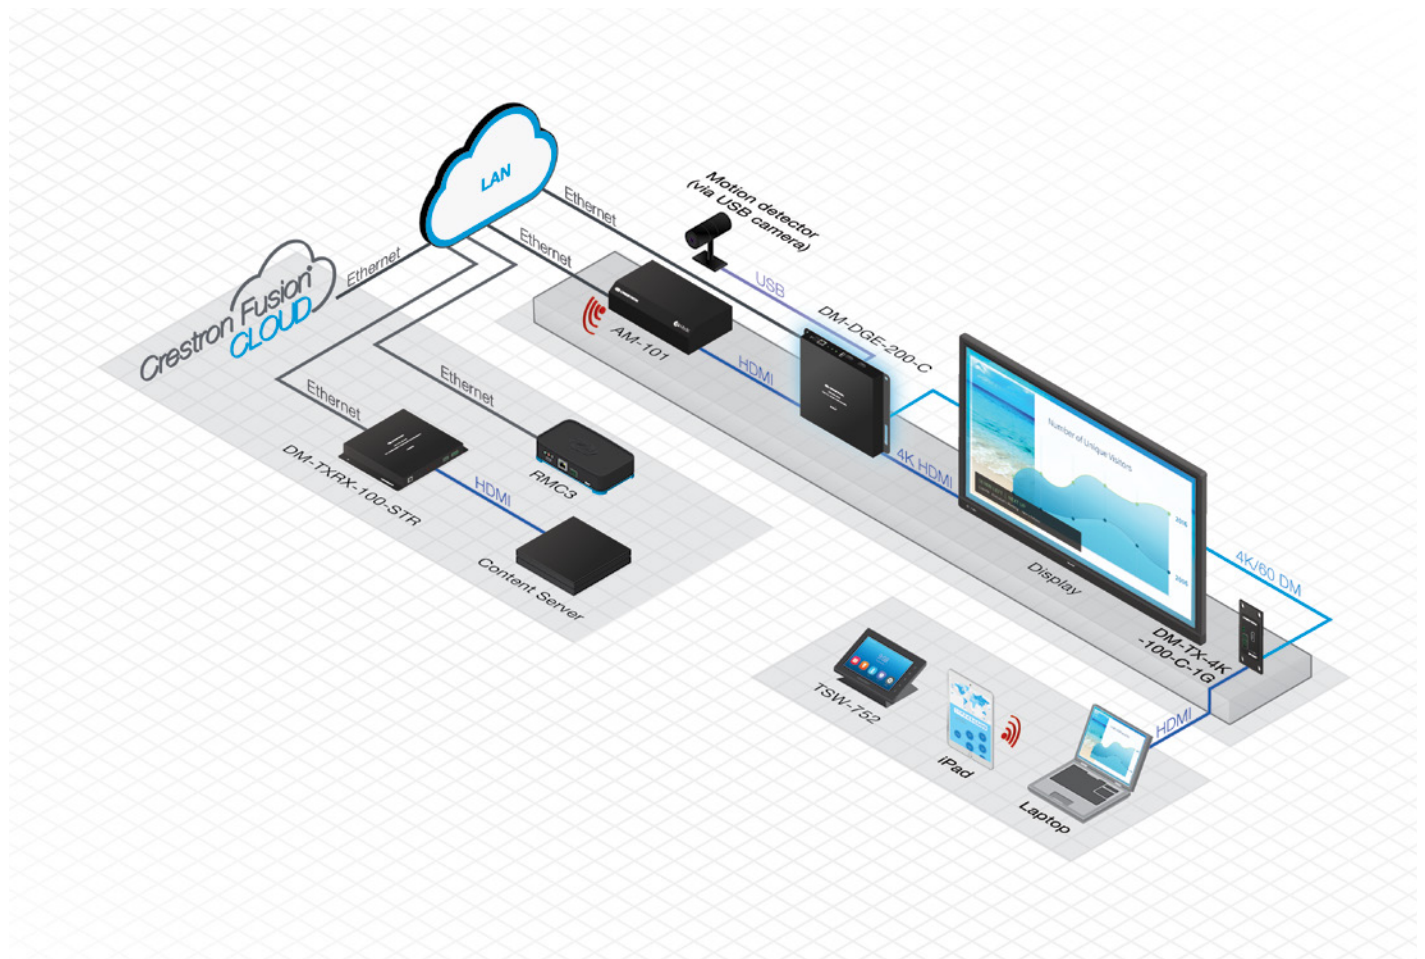

Multi-Format Video Processing

The DigitalMedia DM-DGE-200-C is all about versatility. Add a Crestron touch screen to switch between 4K/60 DM, 1080p HDMI, and high-performance H.264 network AV*; DM-DGE-200-C outputs scaled 4K HDMI to the display. The DM-DGE-200-C features robust AV distribution and switching options, as well as powerful scheduling, automation, and messaging capabilities:

- Automatically turn on the room display when the first person arrives (requires USB camera with built-in motion detector, such as Crestron CCS-CAM-USB-F-200)
- Display a welcome screen with custom graphics, client logo, and simple connectivity instructions
- Show room availability and room calendar information on the room display, including organizer's name, meeting subject, start time, and duration, and availability (when connected directly to Microsoft Exchange or Crestron Fusion Cloud via LAN port)
- Display room scheduling information and collect device and room usage data (when connected to Crestron Fusion Cloud)
- Use the Crestron PinPoint app to locate and book rooms from your phone, and instantly connect to AirMedia when entering the room (when synced to Crestron Fusion Cloud)

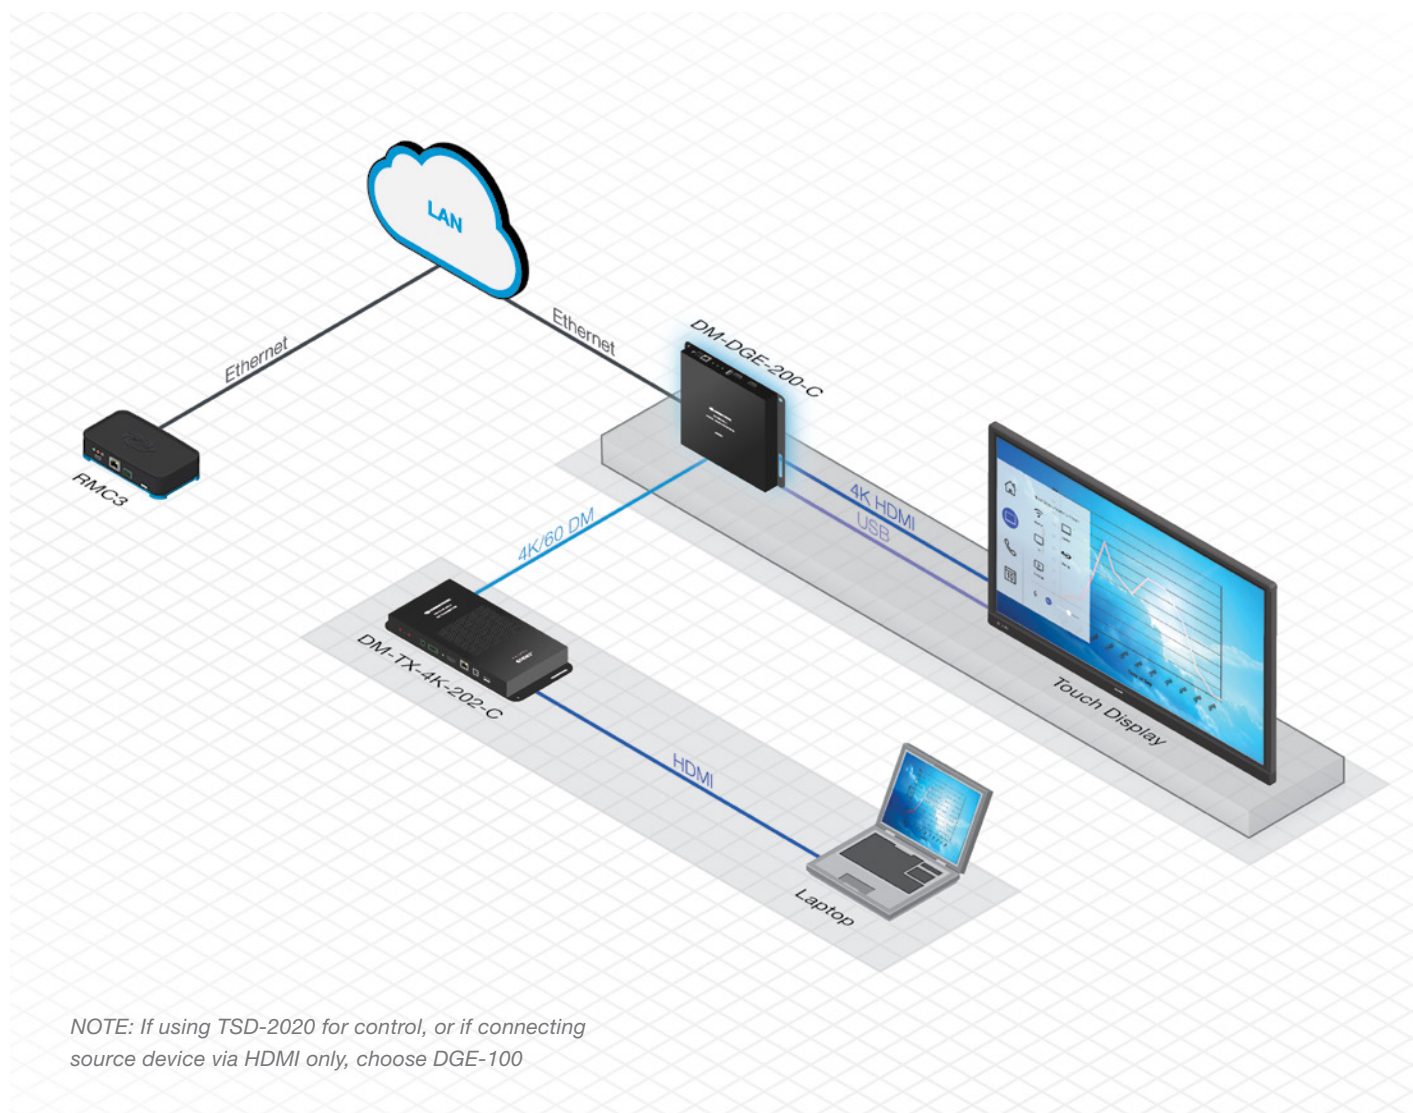

**Network AV requires control system and touch screen*

Digital Graphics Engine for Touch Displays

Of course the DigitalMedia DM-DGE-200-C has a powerful built-in graphics engine, featuring exclusive Crestron Smart Graphics™. It can drive control graphics and web browsing to the Crestron 20" HD Touch Screen Display (TSD-2020) or third-party large-format touch displays.
